SUMMARY

Full-stack developer and B.Tech Electronics & Communication Engineering student skilled in JavaScript, TypeScript, Python, and C++, with hands-on experience building production web applications using Next.js, React, Node.js, Express.js, PostgreSQL, and REST API design. Track record shipping full-stack platforms with authentication, RBAC, and cloud deployment.

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, TypeScript
- **Frameworks & Libraries:** Next.js, React.js, Node.js, Express.js
- **Styling / UI:** HTML5, CSS3, Bootstrap, Tailwind CSS, Material UI
- **Databases & Backend:** MongoDB, MySQL, PostgreSQL, Supabase
- **Tools & Platforms:** Git, GitHub, REST APIs, OpenAPI Specification, Vercel

EXPERIENCE

Software Development Intern

Jun 2026 – Jul 2026

Probey Services (P) Limited, Noida, India

- Contributed to **OpsForge**, an all-in-one software operations management platform, building features for project workflows, task management, issue tracking, and team collaboration for startups and growing teams.
- Developed responsive application features using **Next.js, React, TypeScript, Supabase, and PostgreSQL**, with hands-on work in database integration, validation, debugging, and Git/GitHub-based version control.

Summer Intern

Apr 2025 – May 2025

Brainwave Matrix Solutions, Noida, India

- Developed and optimized **C++ applications** using Object-Oriented Programming (OOP) and data structures, improving code efficiency, scalability, and maintainability.
- **Debugged, tested, and enhanced software modules** by applying strong problem-solving skills and clean coding practices to ensure reliable application performance.
- Collaborated in an **Agile development environment** using Git for version control, contributing to efficient, team-based software delivery.

PROJECTS

OpsForge — Project & Software Operations Management Platform

[Live Demo](#) — [GitHub](#)

- Developed a **full-stack platform with 10+ functional areas** using Next.js, React, TypeScript, Supabase, and PostgreSQL, implementing authentication, RBAC, project and task management, Kanban workflows, issue tracking, notifications, and analytics, and deployed a responsive UI on Vercel.

Wanderlust — Full-Stack Property Listing Platform

[Live Demo](#) — [GitHub](#)

- Developed and deployed a **full-stack web application** using Node.js, Express.js, PostgreSQL, and Prisma ORM, implementing Passport.js authentication, bcrypt password security, session management, Role-Based Access Control (RBAC), and protected CRUD operations for property listings and user reviews.
- Integrated **Cloudinary, Geoapify, and MapLibre GL** for image management, geocoding, and interactive maps, and implemented Helmet, rate limiting, and input validation before deploying the platform on Vercel.

PrepWise AI — Intelligent Interview Analysis Platform

[GitHub](#)

- Developed an **AI-powered interview analysis platform** using speech recognition and real-time analytics to evaluate interview performance and generate personalized feedback.
- Automated key aspects of interview assessment to reduce manual evaluation effort, adding **AI/ML-based confidence analysis, eye-contact detection, and real-time performance insights**.

EDUCATION

Bachelor of Technology (B.Tech), Electronics & Communication Engineering

2023 – 2027

Bhagwan Parshuram Institute of Technology (GGSIPIU), Delhi, India

Higher Secondary Schooling (CBSE)

2022

Mother Divine Public School, Delhi, India

CERTIFICATIONS

- Google x Kaggle Intensive Vibe-Coding Course (Jul 2026)
- Yuva AI for All — NIELIT (Jun 2026)
- Machine Learning Using Python — Simplilearn (May 2026)
- Introduction to Generative AI Studio — Google Cloud (Jul 2025)
